## Health Guarantee

Pond Valley Labradors offers the following guarantee to the original buyer only.

We guarantee the puppy to be free of PRA (progressive retinal atrophy) for up to one year of age. If you suspect your puppy has PRA, it must be verified by a certified Canine Ophthalmologist with CERF.

We guarantee your puppy to not have moderate to severe hip dysphasia for up to 30 months of age. If your veterinarian suspects a dysphasia problem, the x-ray showing this condition must be verified by the OFA (Orthopedic Foundation for Animals). This x-ray must be done before 30 months of age.

If any of these conditions are verified, and the owner wants to keep the dog, the owner will need to send a letter from a licensed veterinarian stating that the dog has been spayed or neutered. Upon the letter's receipt, the Breeder will then replace the dog with a puppy of comparable breeding when available. In any case, all veterinary, diagnostic, return and replacement costs will be the owner's responsibility. This guarantee does not cover any other health conditions, just hips and PRA (progressive retinal atrophy).

These guarantees are dependent upon demonstration that the puppy has received all up to date vaccinations by a licensed veterinarian. Anything that affects the development or well-being of the puppy, such as adequate nutrition, abuse, neglect, trauma, or being used for breeding before two years of age will void these guarantees.
